although most studies of rural society in china deal with land villages in fact very substantial numbers of chinese people lived by the sea on the rivers and the lakes in land villages mostly given to farming people lived in permanent houses whereas on the margins of the waterways many people lived in boats and sheds and developed their own marked features

often being viewed as pariahs by the rest of chinese society this book examines these boat and shed living people it takes an historical anthropological approach combining research in official records with investigations among surviving boat and shed living people their oral traditions and their personal records besides outlining the special features of the boat and shed living people the book considers why pressures over time drove many to move to land villages and how boat and shed living people were gradually marginalised often losing their fishing rights to those who claimed imperial connections the book covers the subject from ming and qing times up to the present

between the 1880s and the 1930s children became the focus of unprecedented scientific and professional interest in modernizing societies worldwide including in the russian empire and then the soviet union those who claimed children as special objects of investigation were initially spread across a network of imperfectly professionalized scholarly and occupational groups based mostly in the fields of medicine education and psychology from their various perspectives they made ambitious claims about the contributions that their emergent expertise made to the understanding of and intervention in human bio psycho social development the international movement that arose out of this catalyzed the institutionalization of new domains of knowledge including developmental and educational psychology special needs education and child psychiatry science of the child charts the evolution of the child science movement in russia from the crimean war to the second world war it is the first comprehensive history in english of the rise and fall of this multidisciplinary field across the late imperial and soviet periods drawing on ideas and concepts emanating from a variety of theoretical domains the study provides new insights into the concerns of russia s professional intelligentsia with matters of biosocial reproduction and investigates the incorporation of scientific knowledge and professional expertise focused on child development into the making of the welfare warfare state in the rapidly changing political landscape of the early soviet era

homoerotic sensibilities in late imperial china is the richest exploration to date of late imperial chinese literati interest in male love employing primary sources such as miscellanies poetry fiction and flower guides wu cuncun argues that male homoeroticism played a central role in the cultural life of late imperial chinese literati elites countering recent arguments that homosexuality was marginal and disparaged during this period the book also seeks to trace the relationship of homoeroticism to status and power in addition to historical portraits and analysis the book also advances the concept of sensibilities as a method for interpreting the complex range of homoerotic texts produced in late imperial china

this study of prostitution addresses issues of female agency and experience as well as contemporary fears about sexual coercion and the forced movement of girls women and police surveillance rather than treating prostitutes solely as victims or problems to be solved as so often has been the case in much of the literature nancy m wingfield seeks to find the historical subjects behind fin de si cle constructions of prostitutes to restore agency to the women who participated in commercial sex illuminate their quotidian experiences and to place these women some of whom made a rational economic decision to sell their bodies in the larger social context of late imperial austria wingfield investigates the interactions of both registered and clandestine prostitutes with the vice police and other supervisory agents including physicians and court officials as well as with the inhabitants of these women s world including brothel clients and madams and pimps rather than focusing top down on the state constructed apparatus of surveillance close reading of a broad range of primary and secondary sources shows that some prostitutes in late imperial austria took control over their own fates at least as much as other working class women in the last decades before the end of the monarchy and after 1918 bureaucratic transition did not necessarily parallel political transition thus there was no dramatic change in the regulation of prostitution in the successor states legislation which changed regulation only piecemeal after the war often continued to incorporate forms of control reflecting continuity in attitudes about women s sexuality

the revolutionary movements in late tsarist russia inspired a reaction by groups on the right although these groups were ostensibly defending the status quo they were in fact as this book argues very radical in many ways this book discusses these radical rightist groups showing how they developed considerable popular appeal across the whole russian empire securing support from a wide cross section of society the book considers the nature and organisation of the groups their ideologies and policies on particular issues and how they changed over time the book concludes by examining how and why the groups lost momentum and support in the years immediately before the first world war and briefly explores how far present day rightist groups in russia are connected to this earlier movement

during the late imperial era 1500 1911 china though divided by ethnic linguistic and regional differences at least as great as those prevailing in europe enjoyed a remarkable solidarity what held chinese society together for so many centuries some scholars have pointed to the institutional control over the written word as instrumental in promoting cultural homogenization others the manipulation of the performing arts this volume comprised of essays by both anthropologists and historians furthers this important discussion by examining the role of death rituals in the unification of chinese culture
